I am looking for a web developer role because of my interest in web development. I am skilled in developing user focused front end and efficient back end. I am currently working as an automation test engineer and looking for an opportunity to where I can improve my skills and contribute for the organization.

Experience

April, 2017– Present

Automation Test Engineer • IBM India Pvt. Ltd., Chennai

I am working in a team that is dedicated to build a Selenium Protractor Test Automation UI framework and to automate test cases.

Have been maintaining this framework and I have fixed various bugs raised by QA teams across the project.

- Back end : **Node JS**
- Front end: **Angular**
- Database: **MySQL**

Education

College: Parisutham Institute of Technology and Science (Affiliated to **Anna University, Chennai**)

Degree: Bachelor of Engineering in Electronics and Communication Engineering

Graduation year: 2012 - 2016

Personal projects

I have enhanced my skills further by working on few of the web development projects. Please find the link to access them https://madhumidhak.github.io
